

👤 Summary

Enthusiastic Frontend Developer with 1 year of hands-on experience in designing and building responsive web applications.

Proficient in HTML, CSS, JavaScript, and modern frameworks like React and Vue.js.

Developed user-friendly features to enhance client engagement during a web development internship.

Skilled in translating design mockups into interactive and accessible web pages.

Focused on delivering clean, reusable, and efficient code that follows industry best practices.

Collaborated with multidisciplinary teams to ensure smooth project delivery within deadlines.

Familiar with version control systems such as Git for streamlined workflow and collaboration.

Passionate about UI/UX and performance optimization to improve user experience.

Proactively keeps up with emerging web technologies and standards.

Eager to contribute strong problem-solving skills and creativity to a dynamic development team.

🧰 Experience

Kodbud

Python Developer Intern

Jul 2025 - Aug 2025

Ludhiana, Punjab

Develop Web Pages Using Python And Django Frameworks

Worked And Gained Experience on complex Projects

Developed Python Applications: Contributed to the development of Python-based applications, focusing on projects

Apex Planet

Web Developer Intern , (AICTE Portal)

Aug 2025 - Sep 2025

Ludhiana, Punjab

- Worked on projects ranging from small startups to largescale enterprises, providing tailored web solutions.
- Working with front-end components (HTML, CSS, JavaScript) and possibly backend languages/ Python/Django).
- Maintaining version control for both application code and database schema changes, and collaborating with other developers/designers to plan and deploy new features.

Project 1

Social_sphere

- Developed SocialSphere, a Twitter-like microblogging web application using Django.

- Implemented user authentication, tweet creation with images, and a search feature to filter posts.
- Designed responsive UI with Bootstrap and integrated media handling for image uploads.
- Project Source code: https://github.com/varinderyadav/Social_Sphere.git

Project 2

Home_chef_app

- *Built a Recipe Management Web Application using Django and Python, with MySQL/PostgreSQL/SQLite (whichever DB you used) as backend.*
- *Implemented full CRUD operations: users can create, view, update, and delete recipes by ID.*
- *Developed user registration, login, and logout functionality to manage access and personalize the experience.*
- *Organized code into modular apps (home, vege) to separate concerns (e.g., recipe display vs category handling).*
- *Handled static files (CSS, JS) and media assets (images) to support recipe images or styling through Django's static/media settings.*
- *Structured code into multiple Django apps (home, vege) to keep functionality modular and maintainable.*
- project Source code : https://github.com/varinderyadav/Receipe_Project.git

Education

Kamla Lohtia SD College, Punjab University

B.C.A. (Bachelor Of Computer Application) - Computer Science, CGPA: 7.93
